## Course Overview

This intense one-day review will cover one of the most critical assignments for the school and community nurse: triage. This program will review gathering a patient's history, assessment skills and critical thinking. This course is designed to provide participants with a review of systems and discuss common emergencies for each system. Interactive triage case studies will challenge even the most seasoned nurses.

### Program Learning Outcomes

This program prepares the learner to:

- Describe the benefits of a 5-level triage system.
- Assign the appropriate triage category to common school and community nurse presentations.
- Describe resources needed for a variety of patient complaints.
- Describe age-appropriate differences when triaging pediatric and geriatric populations.
